

Amidst the sea of handmade jewelry, apparel, housewares, art, and other crafts that populate blogs, websites, and online marketplaces, how do you make your items stand out? The key is great photography. Beautiful handmade items can be undermined by poor or uninspired images that fail to represent their detail and craftsmanship. With this book you'll learn that you don't need expensive professional equipment to get quality results. Get simple, practical advice presented with the crafter in mind. Learn to make a lightbox, avoid camera shake without a tripod, how to use natural lighting, and how to capture the detail in your work. Broken down into specific craft areas, you'll find tips on how to best generate eye-catching images that will help sell your items.
