

A Proven, Step-By-Step Method To Securing a Graduate Job Congratulations! If you are reading this, it is likely that you are nearing the end of your studies and embarking on the path towards a professional career. If you are wanting to get ahead in a highly competitive graduate market, consider this as an opportunity for you to position yourself above your peers. Considering the years of investment and effort spent to finally obtain your degree, it is understandable that you feel anxious and nervous in being able to secure that graduate role. This book is written by Industrial/Organizational Psychologists with years of experience working in the graduate recruitment market. Our team has contracted in both public and private sectors, as well as working internally within the graduate teams of companies. Here Is a Preview Of What Youll Learn... - How to make your application stand out from thousands - The key "it" factors of an ideal graduate and why they get early offers - Why grades don't mean everything - How to pick a company - Haven't graduated? What to do in the interim to prepare - What to do if you are unsuccessful - Building a compelling Cover Letter and Resume - Psychometric testing and how you can get to that next phase - Mastering telephone interviews - How to conduct yourself in each Assessment Centre task - Absolute do's and don'ts in interviews - Sample interview templates - Much, much more! Now you can discover all the above and much more in one easy to read guide Consider how much money you have spent on textbooks through the duration of your course. Each year students shell out hundreds of dollars, not to mention thousands on tuition fees, only to end up unemployed or working in a role that is unrelated to their degree once they have graduated. What is a resource like this worth? Due to the fact that students regularly pay excessive costs already, the price of this material has been subsidized so that it is accessible to all. Try a google search - industry specific reports and knowledge are not only hard to come by, they are also very expensive. In fact, to have an Organizational Psychologist coach you in interviewing would leave you at least \$900 out of pocket per session! Fantastic value at a limited time price This guide is a current and succinct method of supporting career savvy students to get that job. Consider this a very valued investment in your future. Every effort has been made to provide the purchaser with accurate information that reflects the true (and often grueling) graduate market. This guide genuinely aims to make the transition into the workforce less daunting by showing you what to expect, and giving you the certainty that you have prepared to the best of your ability. Download now by scrolling up and clicking the buy button to start getting invited to job interviews!
