

Despite the realities of today's college landscape, individuals around the globe remain disillusioned that attending college guarantees a good job, a stable lifestyle, and self-fulfillment. It does not. Without understanding how to properly navigate the college maze, students will share the same somber fate that has already devastated many recent college graduates: a crushing mortgaged-sized student loan debt, an educated but underemployed life, and an unenjoyable, disengaging job. To help students avoid the inevitable fallout of a poor college approach, or no college approach at all, this book equips students with a devastatingly effective toolkit designed to supercharge college success with optimal efficiency. According to Sir Ken Robinson in his 2013 TED Talk, The dominant culture of education has come to focus on not teaching and learning but testing. Yes, college is one big test. But because the college process is highly regimented and highly predictable, that means the college process can be learned, which means it can be taught, which means it can be mastered. This book will show students how to: Study 80% less and get better grades, Save \$10,000+ in student loans, Earn \$1,000,000+ more over a lifetime. All without working any harder. It is possible to work less and achieve more, even in college.
