With its unique and comprehensive map of personal qualities and its meticulously-crafted definitions, it provides the perfect tool for understanding and describing the distinctive value you bring to an organisation. We live in a highly competitive and rapidly-changing economic environment, and the days of a job for life are long gone. In an attempt to keep costs low and employ people who can deliver the products and services they need, employers often have to make a quick decision: do they employ based on skill or on attitude? If you're not the person asking that question, it's increasingly important to be able to identify what makes you worth employing. The rate of innovation in the world of information and communications technology means that the skills we had just five years ago are no longer good enough for today's employers. More and more, the employer-employee relationship is based not just on what we know and on what we can do, but on who we are. Employers today are looking for breadth and depth of experience in their employees, and for those who possess the qualities, values and attitudes which will add value and bring success to their organisation. Your ability to articulate your qualities, values and attitudes is therefore absolutely essential. ResourcefulMe is a powerful and practical resource that will help you to: Develop a greater degree of self-awareness. Understand the value you uniquely bring with you. Expand the number of qualities you can include in your CV, personal statements and profiles. Enrich the answers you give to those awkward interview questions. Talk

with clarity, confidence, authenticity and sincerity about your worth to the organisations you work for. It is only when you understand your true value and can express it clearly and succinctly in ways that people can appreciate and relate to, that you will be able to leverage your personal qualities. With ResourcefulMe, you can make your value work for you.
