

In recent years therapeutic risk management has moved from an underdeveloped concept to core competency for regulatory professionals. Here, for the first time, is a publication that addresses the whole spectrum of the global risk management revolution, from the high science to the intensely practical feet-on-the-ground application. Tap into the expertise of regulators, contractors, academics, and members of the global industry and examine risk management regulations in Australia, Canada, EU, Japan and the US. Gain insight into key elements of risk management; including preclinical planning, Quality Risk Management, risk: benefit assessment, clinical evaluation reports and risk communication. RAPS does not accept exchanges or returns on items that have already been shipped or emailed. Cancellations of orders must be made within 24 hours from the time the original order was placed.
