

Ceramic Studio: Hand Building

With a wealth of information, elegant design, and time-tested advice, this beautiful beginners book covers the most popular topic in ceramics. Just as in her celebrated workshops, artist Shay Amber guides would-be potters through all the basics of hand building, from pinching and coiling to draping slabs, adding gorgeous surface embellishments, and firing. Twelve teaching projects—including a pinched tea bowl and coil-built espresso cup set—build a repertoire of skills. Hundreds of step-by-step images demonstrate key steps while extensive galleries of images provide inspiration. This book was formerly published in hardcover as *Ceramics for Beginners: Hand Building*.
