

Patterns on Textiles and Other Objects of the Ede and Mnong in the Central Highlands of Vietnam (Studies in the Material Cultures of Southeast Asia 9)

This is an indispensable contribution to the literature on the material culture of the peoples of Vietnam's Central Highlands. In addition to providing a great deal of new information on the textiles of the Ede and Mnong, two of the most important ethnic groups in the Central Highlands, it also discusses baskets and architectural decoration. These and other peoples in the Central Highlands have a very rich traditional material culture that has been neglected in Southeast Asian literature to a great extent. The present work amply illustrates just how rich this tradition is and will help to draw attention to a heritage that is rapidly disappearing. Maps, drawings of patterns, black and white photographs, and over 200 color photographs accompany the text.
