

Superstar Job Interview: Leveraging the Power of Mind Maps and Job Interview Portfolios To Get The Job!

The resume is now over 500 years old (thanks Da Vinci!), and job interviews are a pain, but unfortunately there is no getting around either of them. This book will guide you in making sure the interview goes as smoothly as possible; but better yet, if you follow the basic steps outlined in the book you will be more confident during the interview, and you will do a fantastic job of impressing the interviewer with more than just a resume and talk - but actual samples of your work. The methods I go over through the 18 chapters are time-tested by me personally. I can show you how to use them because I know they work - for me, as well as for those who I have instructed in these methods. I have tried to keep this book short because there are really only three things that you need to be a Superstar in a job interview: 1. A well-crafted resume 2. A Mind Map that is visually tuned to the position job description and your resume 3. And most important of all, a Job Interview Portfolio that contains samples of your work. Item #1 has been covered in countless books and workshops, and covered well. Items #2 and #3 have either received no coverage, or spotty coverage over the years. I intend to change that. With Superstar Job Interview, you will be able to focus on what will nail the job interview and get you the job that you deserve!
