

Renewing American Culture: The Pursuit of Happiness (Conflicts and Trends in Business Ethics)

The rapid changes affecting America and the world have been led by economic and technological forces. The cultural dimensions of this change have been largely ignored in the process. Without a significant advance and innovation in the realm of culture and value, the great economic and technological gains of the recent past are exposed to great risk. A new, life-affirming framework that reconnects economics, culture, science, art, and leadership is critically needed to mitigate this risk.
