Because of the authors slight delay in the publishing of her recent magazine, THE ECLIPSE, the author Amina Delamere will offer her new release, for sale as a matchbook. Her new release is based on what science views the zodiac as pseudo science, even though some persons literally may swear of how effective of the way the stars depicts an individuals future. Included in her new magazine is a poem dedicated to one of the most outstanding science fiction writers of her time; Octavia E. Butler. Her gift as a science fiction writer has placed even today; Miss Butler as one of the most popular of all writers; however my personal point of view is the way her writing endeavors has far extended Miss Butler above all because as an African-American woman sy-fy writer at the time of her career; she had far excelled even most of the white, writers then, who had been mostly men at the time of Octavia E. Butlers pinnacle.
