

The Law of Success, Volume III: The Principles of Self-Creation

Napoleon Hill stunned America when he published the first edition of The Laws of Success. It had taken Hill twenty years to research and write. He had personally met with hundreds of the most famous self-made multimillionaires so he could study their habits, analyze their methods, and learn their secrets of success. After further testing and proving his theories, Napoleon Hill refined them into 17 basic principles that anyone could master and use. This recording explains step-by-step how you can use the following four Principles of Success:--Doing More Than Paid For: Take advantage of the Law of Increasing Returns to earn more for service rendered.--Pleasing personality: transform yourself so that you can master your relationships and control any situation.--Accurate Thinking: Separate real facts from mere information so you can devise definite, practical plans.--Concentrate: Laser-focus your mind on one subject at a time so the plans you create are plans that will work. This revised and updated edition--the third of four volumes--incorporates new information, explains historical context, and augments Napoleon Hill's original examples with contemporary stories which conclusively prove that The Law of Success is as relevant and applicable today as it was when this landmark book was first published.
